Amphenol
FIBER OPTIC PRODUCTS

Simplifying Fiber Network Deployment

Fast, Reliable, and Scalable Solutions for Modern Fiber Optic Networks

Pluggable FTTx Solutions

eAMT / *Pluggable fiber distribution point connecting optical trunks to subscriber.*

Key Features:

- Supports P2P and PON architectures
- Sealed FTTx drop and distribution point
- Available with pigtailed or pluggable input, 2–12 drop ports

Ideal for:

Aerial, pedestal, or underground vault installations

Multi-port Service Terminal with Pigtailed Drop Ports / Mini AMT

Key Features:

- Ideal for ground level developments
- Compact design with pigtailed drop fiber connections
- Available with pigtailed or pluggable input, 2-12 drops

Ideal for:

Residential or rural areas requiring quick, efficient deployment

Feeder and Drop Cables

H-Connector (Single Fiber Drops):

- Fully sealed connection SC / APC
- Applications: Direct burial, aerial, or conduit installations

M-Linc (Multifiber Feeders):

- Pre-terminated breakouts eliminate fusion splicing
- Fully sealed 12 fiber connection

Ideal for: Interchangeable drop and distribution connections

5/8-24 Node Service Cables / Node Service Cables

Key Features:

- Connects splice points to CATV Service Nodes
- 2–24 fibers with straight, 90-degree or flexible mounting options
- Unique design removes the need for extra sealing heat shrink or assembly

Ideal for:

Seamless legacy network upgrades with installations above, at, or below ground
